

Sagamihara, Kanagawa

The Republic of Sagamihara

What makes Sagamihara appealing is its optimal mix of city and nature, with further development as a wide-area hub in the southwestern Tokyo metropolitan area anticipated due to its easy access to the city center, highly convenient urban infrastructure, and plans to construct the only Linear Chuo Shinkansen station in Kanagawa, while at the same time it is blessed with such beautiful natural settings as the Sagami River, Lake Sagami, and Lake Miyagase as well as vast, lush forests that foster clear streams and five lakes essential as water sources for Kanagawa residents.
